**Minimize Your Challenges Today,
Before They Magnify Tomorrow.**

ADVIA Centaur® CP Immunoassay System

Answers for life.

Tomorrow, You'll Have Less Time, Space, and Staff. Are You Prepared to Face the Challenge?

Be Ready with ADVIA Centaur CP Immunoassay System

Does your system have a limited menu? Are too many send-out tests driving up costs?

You need an immunoassay system with the capacity to handle your growing test volume. ADVIA Centaur CP is a compact, high-performance benchtop immunoassay system that enhances your in-house testing capability with a broad menu of assays. So now you have the power to maximize productivity, expand capacity, and bring more tests in-house—no matter how large your workload.

Does it take multiple systems to complete your menu? Are they taking over your lab?

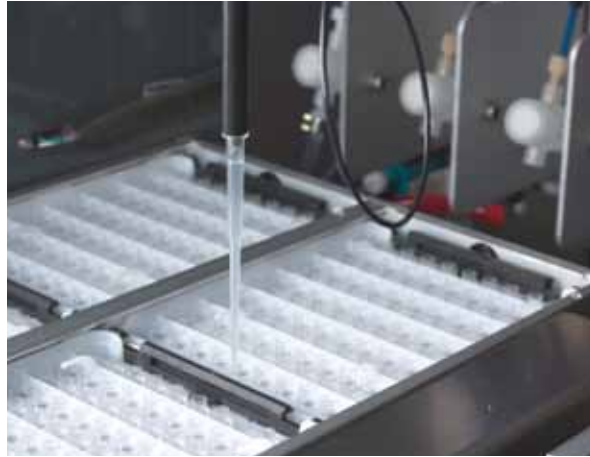

You need a compact, powerful immunoassay analyzer that minimizes space requirements. ADVIA Centaur CP makes it possible to expand and consolidate at the same time. It eliminates the need for multiple systems by giving you a broad assay menu. So now you can increase your lab's efficiency by bringing a wide range of assays onto a single workstation—and take back your lab.

Does your system bottleneck at peak times and have slower than needed TATs?

You need a solution that consistently performs faster, delivers more predictable TATs, and maintains speed and accuracy even during peak workload times. With ADVIA Centaur CP, you can stay ahead of your growing test volume, maximize productivity, and meet the growing needs of your lab in less time.

Do you expect your test volume to increase? Will you have the staff to handle it?

You're under pressure to deal with sharply rising workloads at the same time your staff is shrinking and it's only going to get worse over time. ADVIA Centaur CP lets you do more with fewer resources. It's easy to operate, increases efficiency, and streamlines workflow, with the added benefit of eliminating redundant or antiquated systems.

Meet the Increasing Demands of Your Lab

The ADVIA Centaur CP is the high-throughput benchtop immunoassay system that empowers you to overcome the challenges you face today and tomorrow. By delivering a broader menu, shorter TATs, and enhanced consolidation, you can do more with fewer resources—without compromising efficiency or productivity.

More Predictable TATs

- STAT port guarantees priority sampling at any time
- Delivers shorter TATs on both routine and STAT tests
- Routine test results available in 15 minutes, on average; for example, B12/folate
- High throughput, up to 180 tests per hour, and two to three hours walkaway capacity enable you to keep pace with peak workload times

Enhanced Menu Capacity

- ADVIA Centaur CP offers a comprehensive disease-state menu and will continue to expand with the addition of infectious disease assays
- Disposable tips eliminate carryover, critical for infectious disease testing
- 15 onboard reagents maximize test capacity

Practical Productivity

- Combining the ADVIA Centaur CP with the ADVIA® 1200 Chemistry System and the ADVIA CentraLink® data management system offers superb speed and turnaround time for chemistry and immunoassay testing needs
- “Always ready” feature allows true continuous operation. This enables the operator to attend to most functions, including loading samples, reagents, and most consumables or emptying the waste without pausing or interrupting the test processing
- The ADVIA Centaur CP uses the same reagent packs, ancillary, consumables, and wash as the ADVIA Centaur and the ADVIA Centaur XP. This commonality of reagents and consumables allows an easier and more efficient management of inventory
- ADVIA Centaur CP, in conjunction with the Centaur, provides standardization of results between satellite labs and the core or reference laboratory
- Easy maintenance procedures require minimal operator time
- Remote connectivity capability allows for remote software upgrades and remote diagnostics, which will help minimize system downtime and provide quicker resolution of issues*

ADVIA Centaur® CP Disease-State Assay Group

Anemia
Bone Metabolism
Cardiovascular
Infectious Disease
Reproductive Endocrinology
TDM
Thyroid Function
Tumor Markers

Siemens Healthcare Diagnostics, a global leader in clinical diagnostics, provides healthcare professionals in hospital, reference, and physician office laboratories and point-of-care settings with the vital information required to accurately diagnose, treat, and monitor patients. Our innovative portfolio of performance-driven solutions and personalized customer care combine to streamline workflow, enhance operational efficiency, and support improved patient outcomes.
